

To whom it may concern,

After carefully reading all the documents available online I would like to voice my concerns. Under the proposed changes I would be forced to possibly pay tens of thousands of dollars, I am on a single fixed income and in no way could afford this. The state would essentially be forcing me out of my home. At a time when foreclosures are at an all time high I do not feel like this would be a good time to enact this proposed policy. Please take some time to look into the impacts this would have on us and reconsider, I could not afford this and I would eventually be foreclosed on. Please do not do this to me.
